

Teachers:

Here is a data gathering organizer for the research project for *Talking Walls*. Use the 3rd grade's *Talking Walls* Website of country and wall links to let the students find their information. They can write the information on a printout of this form or enter their information directly into the template using AppleWorks.

Have students make a "paper" brochure for their country. Later in the year, they can create a slide show in AppleWorks including information and graphics.

The web site address is accessible through the LMSD Elementary Tech Pilot Menu page at

http://homepage.mac.com/tech_pilot/techmenu.html

or directly at

http://homepage.mac.com/grade_3too/talkingwalls/talkingwalls.htm

Using the Tech Menu page makes one less address to clutter up your list of Favorites and eliminates time wasted if students make mistakes in entering the address on computers where it isn't already in the Favorites.

_Margy Kurtz (BH: grade 3)

Name _____

RESEARCH PROJECT

Country:

Continent:

Capital:

2 cities:

Language(s):

Currency: (money)

Gather and record information about each of the following topics

Climate/ Land

People (religion, clothing, traits)

Foods:

Interesting Facts/Places:

Flag (Describe it. Draw it, Explain what it means.):
