

Teachers:

Here is the data gathering organizer for the research project for *Talking Walls*. I have revised it a bit from the original. I will use the 3rd grade's *Talking Walls* Website of country and wall links to let the kids find their information. I will have them make a "paper" brochure, and then later in the year, they'll create a slide show including information and graphics in *AppleWorks*.

Here is the web site address. It is accessible through the Tech Pilot Menu page

[http://homepage.mac.com/tech\\_pilot/techmenu.html](http://homepage.mac.com/tech_pilot/techmenu.html)

or directly at

[http://homepage.mac.com/grade\\_3too/talkingwalls/talkingwalls.htm](http://homepage.mac.com/grade_3too/talkingwalls/talkingwalls.htm)

Using the Tech Menu page makes one less address to clutter up your list of Favorites and eliminates time wasted if students make mistakes in entering it on computers where it isn't already in the Favorites.
