Native Americans

we have been studying many native american groups. these groups include the inca maya aztec pueblo and inuit tribes. did you no that some of these tribes still exist today. on jan 23 2001 i have a report do about won of these tribes. my tribe that i had to study was the inuits. can you believe that the inuits really do live in igloos. i though that was just a myth. the inuits live in the area we call alaska today if you go to northern alaska your warmest clothes will probably not be warm enough. inuit clothes are maked of to furs and the furs are sewn together back too back. i learnt a l lot about my tribe the inuits and i really like this project
